From Recording to Managing Ship Data

[WWW.NAPA.FI](http://WWW.NAPA.FI)

**NAPA Logbook** is an official electronic data recording and managing solution for replacing traditional paper logbook onboard. NAPA Logbook users can easily record and search any official logbook event, filter results with keywords, make calculations based on automation signals and check values against boundary conditions.

Thousands of officers around the world are relying on NAPA Logbook, enabling considerable time saving and avoiding mistakes in data recording. NAPA Logbook complies with international regulation on electronic recording of navigational data and is accepted by more than 20 flag authorities.

NAPA Logbook is available for all ship types as a one-off license or monthly service solution.

## Decrease workload and errors

Replace ALL paper logbooks; saves considerable time and effort for officers

## Increase transparency

Applicable for all data recording; available anytime onboard and ashore

## A component in big data

Monitor, analyze and combine data for optimizing your operations

"NAPA Logbook has reduced the workload on the officers greatly. The high level of automation both makes the log quick and easy to use, but also drives the bridge operations, prompting the user for tasks to be done."

*2nd Officer Navigation*

"Simplifying, it can save up to 45 minutes of my work on every departure/arrival!"

*Bridge Officer*

NAPA is a global leader in software, services and data analytics for the maritime industry; providing intelligent solutions for safety, efficiency and productivity in both ship design and operations. NAPA operates globally, with 11 offices across Asia, Europe and the Americas.

## From Recording to Managing Ship Data

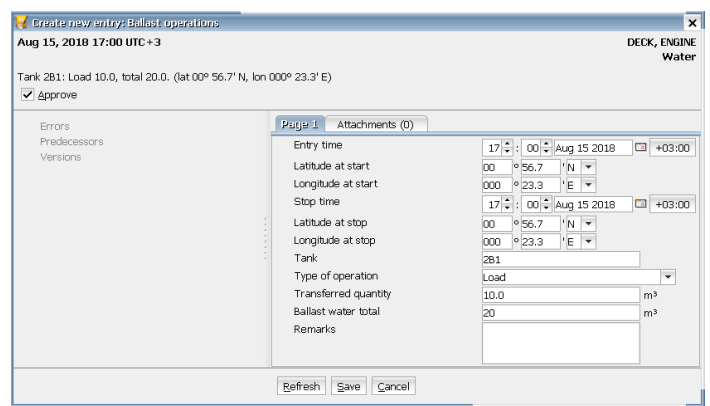

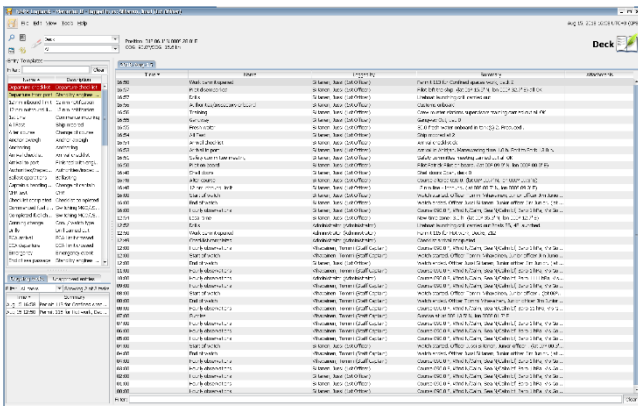

WWW.NAPA.FI

### NAPA LOGBOOK - KEY BENEFITS

- Replace paper logs
- Easy to use, always readable
- Decrease workload - Increase safety
- Use logbook information for data analysis
- All logbooks available anywhere onboard
- Combines logbooks and checklists
- Data directly from automation
- Entries can be triggered by time or automation signals
- Tamper proof, rigorous backup system
- Continuously maintained and developed by NAPA

### NAPA LOGBOOK - KEY FEATURES

- Create logbook entries manually
- Entries automatically from different sources for user approval
- Automatic creation of dependent entries
- Add attachments to logbook entries
- Search entered data
- Print out logbook data
- Secured use and backing up

### INTEGRATE WITH NAPA SOLUTIONS

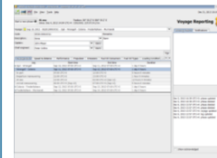

#### NAPA Status Board

Monitoring of logbook events as well as any kind of connected external signal, such as stabilizers or wind speed

#### NAPA Voyage Reporting

Automatic creation of voyage reports

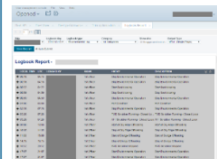

#### NAPA Decision Support Cards

Any kind of operational checklists: Departure, Arrival, Anchoring, Helicopter operations, etc.

#### NAPA Office

Office module for ship-wide monitoring of the status of the ship and data analysis
