Deepen your NAPA skills with SOLAS ProbDA and Macro writing course!

This ONLINE 6-days course covers everything from basic to advance level on how to do probabilistic damage stability calculation with Napa and macro writing skills.

The basic skills to use NAPA are required. It is recommended to be familiar with the topics handled in NAPA Basic Training.

Contents

The first part of the course will cover probabilistic damage stability calculation method according to SOLAS II-1. The topics include for example the index calculation for side damages, the Regulations 8 for minor side damages, and the Regulation 9 for bottom damages.

For example, all the required opening and cross-flooding device definitions, tools to analyze results etc. will be covered. After the course, the participant has the required knowledge to calculate the rule compliance for SOLAS II-1.

The second part of the course focuses on understanding the principles of NAPA macros: how to read, write and debug NAPA Basic macros. Last part of the session focuses on tabular calculations.
